Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. Systems can customize by adding or deleting columns. Important notes for each column are in Row 12; also see the **Template Instructions** worksheet for detailed instructions. Note that users can freeze panes to enable them to see the headers and notes when scrolling. The worksheet includes panes in rows 11-20 and 6.

<p>A Unique ID is recommended for each service line.</p> <p>Enter the street address of all service lines in their internal inventory. For the publicly accessible version, location identifiers are required for lead and abandoned requiring replacement. If the system does not use addresses for that location identifier, enter the location identifier.</p> <p>Enter the location identifier if sensitive subpopulation, e.g., day care, school, hospital, or other facility. If the location identifier is not used, enter "None."</p> <p>Drop-down list includes recommended subclassifications. If "Non-Lead" Other, describe in Notes field.</p> <p>Select Yes, No, or Don't Know.
